M e m o

TO: **REFERRING CLIENTS**

FROM: Barb Baltzer, Coordinator
 Laboratory Reference Centre (LRC)
 Hamilton Regional Laboratory Medicine Program (HRLMP)

DATE: October 1, 2012

SUBJECT: **ACTH – Reference Interval Changes**

We have implemented an updated version of our immunoassay platform on which we measure Adrenocorticotrophic Hormone (ACTH). The platform has changed from Immulite 2500 to Immulite 2000 XPI. The reagent formulations have not changed. The package insert has a reference interval that is slightly different from the previous platform. We have thus updated the reference interval accordingly.

Effective immediately, the reference interval has been revised to:

< 10.3 pmol/L (*previously 2 - 11 pmol/L*)
